Employers
Deliver more affordable, convenient care – at work.
The kiosk brings together unmatched value for both
employers and their employees:
• Open a low-cost clinic
• Reduce absenteeism
• Improve productivity
• Increase employee satisfaction
• Extend your existing clinic staff to serve
Retailers
Offer doctor visits in stores and become a one-stop
health and wellness destination. Retail outlets are
uniquely positioned to deploy the kiosk to consumers
with minimal overhead:
• Increase store traffic
• Expand and attract customers
• Capture RX/OTC transactions
• Combine physical staff with online staff
• Build partner programs
Health Systems
Provide a compelling acute care option for local
consumers and those in surrounding areas. Health
systems can leverage their brand equity with the
kiosk:
• Acquire and retain patients
• Offer an alternative for non-emergent ER visits
• Project care offsite and at partner locations
• Grow brand loyalty
• Ensure continuity

AMERICAN WELL
The Health Kiosk
The best parts of the doctor’s office, all in one convenient
place. A new take on the modern clinic lets you bring healthcare
everywhere.
www.americanwell.com
The Enclosed Model can be placed in public areas to create a convenient, private space. Physical features include:

• Sliding privacy door
• Four brandable exterior panels
• Programmable LED lighting behind panels and in device slots
• External touchscreen tablet, programable to play custom media
• Automatic hand sanitizer
• Air purifier/white noise machines
• Overhead lighting and "In Use" light
• Noise canceling acoustic fabric on the ceiling for added privacy

www.americanwell.com

The Health Kiosk by American Well facilitates live, on-demand healthcare consultations from a physical point of care. Our consumer-friendly technology and integrated tools support high quality interactions — seamlessly capturing intake information, clinical data, health insurance coverage, and payment. After each visit, the patient receives a comprehensive electronic summary of any notes, diagnoses, prescriptions, and follow-ups from the visit. This summary can be shared with treating physicians at any time to support continuity of care.

Launching The Health Kiosk: Staffed vs. Unstaffed

The kiosk supports a self-guided touchscreen experience and can operate without any staff required. This gives organizations the flexibility to launch kiosks in the way that best fits with their objectives. There are, however, added patient benefits to incorporating staff with kiosk services. Staffed Kiosk Benefits

• Facilitating exams
• Assisting with peripheral devices, including the otoscope* 
• Ensuring sanitation between visits
• Timely reporting of maintenance issues
• Promoting interactions with specialty care clinicians
• Addressing common questions

*Otoscope only available for use in staffed kiosks.

What can The Health Kiosk do for your organization? Quite a lot.

The Console Model can be placed in an available space that does not require the added privacy of the enclosure. Physical features include:

• One brandable exterior panel
• Programmable LED lighting in device slots
• Handset for private audio

The Desktop Model can be placed in an available space that does not require the added privacy of the enclosure. Physical features include:

• One brandable exterior panel
• Programmable LED lighting in device slots

Key Features

• Touchscreen interface
• High-definition webcam
• Integrated peripheral and biometric devices¹
• Vital sign collection, supported by video tutorials
• E-prescribing / pharmacy integration
• Credit card and driver's license readers
• Real-time eligibility
• Brandable exterior panels
• Programmable LED interior & exterior lighting

²Meets fire code and handicap accessibility requirements.

¹Devices include: stethoscope, dermatoscope, otoscope, blood pressure cuff and scale.

Organizations can use their own clinicians to deliver services, locally or nationally.
