

TELEMEDICINE DEVICES

Industry-Leading Telemedicine Carts & Peripherals

A full product line to complement your direct-to-patient programs

American Well has expanded its comprehensive line of telemedicine devices to offer three additional telemedicine cart models, three stethoscopes, and two multi-purpose examination cameras.

These devices are designed and tested to be the most reliable, safe and user-friendly solutions to deliver a virtual care experience for in-person staff, their patients, and remote specialists.

- **Intuitive** - purpose-built to offer the physical design and system controls to meet the needs of clinicians
- **Safe** - FDA Class 1 registered and tested to meet the requirements of global safety standards
- **Reliable** - remote device monitoring and management to proactively track and maintain solutions
